

Product: **High visibility clothing, T-shirt. Type: "EXETER"**

Intended use: Clothing is worn as top clothes - they are highly visible and must not be covered by other clothes or accessories. Covering of clothes is possible only with other high visibility clothes. The user wearing this clothing is well visible in dangerous situations during a day under any lighting conditions and also when it gets dark and the person is illuminated by a vehicle. These clothes should be worn by everyone who is exposed to such situation. They may substantially reduce any risk of accident. The examples of activities may include works carried out on roads, maintenance of tracks, rehabilitation of contaminated areas, emergency and ambulance service, transport, post services, security agencies, handling works in areas with moving vehicles etc.

Selection of the right reflective occupational clothes with high visibility in accordance with the respective class must be carried out according to specific needs of the respective workplace, type of risk, and concrete conditions of the respective workplace. The right selection is within competence of an employer, who must determine and select the right type of clothes before they are used.

Pictograms:

	<p>EN ISO 20471:2013 Class 2 – the number next to the graphic symbol stands for the clothing class based on the surface of high-visible materials.</p> <p>Maximum number of washing cycles after which the jacket preserves its high-visibility properties.</p>
---	---

Minimum required area of conspicuous material in m²

	Clothes of class 3	Clothes of class 2	Clothes of class 1
Underlying material	0,80	0,50	0,14
Retroreflective material	0,20	0,13	0,10

The clothes conform to the basic hygienic and safety requirements in accordance with the Regulation (EU) 2016/425 and other standards mentioned in this document. Personal protective clothes of II. class.

EN ISO 13688:2013

EN ISO 20471:2013, EN ISO 20471:2013/A1:2016

Identification of the Notified Body that carried out the conformity assessment: NB 2369, VIPO a.s., Gen. Svobodu 1069/4, 958 01 Partizanske, Slovak Republic.

Restriction of use: To provide the right protection level, as specified above, the clothes must be always worn buttoned up. The clothes must not come into contact with liquid chemicals, particularly with dissolving agents and fire. It is also necessary to avoid excessive mechanical damage, particularly retro-reflective parts (tearing, braking off etc.).

Warning:

- Check the clothes' condition visually before every use. The clothes must be kept clean to remain functional. If they are dirty or pale, replace them immediately!!!
- If integrity of the clothing becomes disrupted (rupture, wearing out, material excessive thinning, unstitched seams etc.), the degree of protection is lower and the product becomes inconvenient in accordance with above specified legal and technical regulations.
- Repair them only using the materials and fabrics that meet the requirements of the respective standard.
- The protection class is determined based on the area of visible material; therefore, marking of the clothes on their surface is restricted or limited.
- If the product is used, kept, or treated differently than as specified here in this document, it may be destroyed or its functions may be changed.
- The above-specified maximum number of washing cycles is not the only factor related to the life of the clothes. The clothes' life will depend on their using, storing etc.
- Wearing the hood may impair sharpness of hearing and peripheral vision.
- No high-visibility clothing can guarantee absolute visibility in every situation.

If the clothing is used when strictly following the specified purpose, then there are no hazards that could endanger the user's health (the product must not be used in the circumstances that require other types of protective functions, e.g. protection against heat hazards, clothing caught by moving parts of a machine etc.).

Transportation, packaging type: The products are packed in PE bags. The products must not be damaged during their transportation.

Storage: Do not store in places with direct sun. Store the clothes in closed, dry, well ventilated stores. Protect them against radiant heat of heating devices. They must be stored not closer than 1 m at least from heating bodies. If the clothes are wet, leave them to dry out at room temperature and then store them.

Material: main material 55% cotton, 45% polyester. Additional material 100% polyester. Retroreflective strips 5 cm wide.

Sizes: Sizes corresponding to the prescribed intervals in accordance with EN ISO 13688:2013.

The clothes are manufactured in the standard height 182cm. Permitted tolerance of deviations in dimensions is $\pm 5\%$.

Maintenance and cleaning: The user finds the product maintenance symbols on sewn-on label.

How to maintain at home: Maximum 25 wash cycles, wash at a temperature of maximum 30 °C, do not use fabric softener and BIO detergents, gentle treatment, cold rinse, short spin, do not bleach, do not tumble dry, do not iron, do not chemical clean.
